

Test Case 1: Extract Placeholder Texts

- **Description:** Extract and print all input field placeholders from the subscription form.
- **Steps:**
 1. Navigate to <https://www.blink22.com/>
 2. Click on the **Blog** tab in the top navigation.
 3. Scroll to the subscription form.
 4. Extract placeholder attributes from all input fields.
- **Expected Result:** Placeholders like “Type your name” and “your email” should be printed to the console.

Test Case 2: Required Field Validation

- **Description:** Check that the form cannot be submitted if required fields are left empty.
- **Steps:**
 1. Leave the email field empty.
 2. Click the submit button.
- **Expected Result:** An error should appear, or the form should not submit.

Test Case 3: Invalid Email Format

- **Description:** Verify that the form doesn't accept an invalid email.
- **Steps:**
 1. Enter `test@invalid` in the email field.
 2. Submit the form.
- **Expected Result:** The Form should display a validation error for an invalid email.

Test Case 4: Valid Submission & Thank You Message

- **Description:** Verify that the form submits successfully with a valid email and shows a thank-you message.
- **Steps:**
 1. Enter a valid name and email (e.g., John Doe & `test@example.co`).
 2. Submit the form.
- **Expected Result:** A "Thank you" message appears after successful submission.
